Introduction

SAP Business One Solution Packager enables software solution providers (SSPs) to develop industry solution packages based on SAP Business One.

The application:

Is a standalone tool

Works on SAP Business One

Supports SQL Server 2005 and SQL Server 2008

Supports 10 localizations:

- Australia/New Zealand
- Brazil
- France
- Germany
- India
- Italy
- Mexico
- Spain
- United Kingdom
- United States of America

Installing Solution Packager

Prerequisites

You use Microsoft Windows XP or any higher release.

The installation machine complies with all hardware and software requirements, as detailed in the SAP Business One System Requirements document available at <http://channel.sap.com/sbo/documentation>.

You have installed SAP Business One 8.8.

Procedure

From the SAP Business One installation CD, under: ...\\Packages\\Solution Packager and in the *Welcome* window, double-click Setup.exe, choose the *Next* button.

In the *Customer Information* window, proceed as follows:

- Enter your name and the company name.
- Select the users for whom you want to install the application.
- Choose the *Next* button.

In the *Choose Destination Location* window, either accept the default installation location for Solution Packager or browse for a different directory, and then choose the *Next* button.

In the *Select Features* window, select the *Company Packager* checkbox and then the *Next* button.

In the *Start Copying Files* window, choose the *Next* button.

The set up wizard begins copying the installation files.

When the *Complete* window appears, choose the *Finish* button.

The installation program completes the Solution Packager installation.

Result

You can now launch the Solution Packager tool.

To access Company Packager, in the Microsoft Windows task bar, choose *Start* → *All Programs* → *SAP Business One* → *Solution Packager*.
